DBMI OPEN INSIGHTS

Collaborations to Advance Health Equity Using Real-World Data

William (Bill) Adams, MD

Professor of Pediatrics
Director, BU-CTSI Biomedical Informatics Core
Informatics Director, Boston HealthNet

Dr. Bill Adams will provide an overview of current translational informatics activities at Boston Medical Center and the BU Medical Campus with a focus on innovative approaches to measuring and advancing health equity. An important goal for the meeting will be to explore and identify new opportunities for collaborative projects and shared training opportunities.

Wednesday, October 11, 2023 • 12:00–1:00pm • Free Pizza Lunch 11:30am
Countway Library • Minot Room (5th Floor)

The DBMI Open Insights Seminars are occasional research talks related to the mission of the Department of Biomedical Informatics. This includes themes such as:

- Provisioning big data to the scientific community
- Getting the big picture on human health
- Learning from each patient
- Advancing basic science with data science
- Understanding disease beyond heredity: environmental impact
- Instrumenting the health enterprise for discovery and intervention
